**A Wireless System that Fulfills  
All Communication Requirements  
in Any Small Office or Your Home**

Now you can have the styling, features and performance of a PBX System that you would normally expect only from an expensive equipment. The HKC 2.4GHz System comes with a base console that communicates at 2.4 GHz spread spectrum with up to 10 desktops or handheld extensions. You can place the base console out of the way to avoid messy wires. With the wireless system, it is simple to install and extensions can be placed at anywhere to your convenience. Plus, the rechargeable handheld extensions are portable and even have vibration function, a convenient belt clip and headset jack.

The system makes a small office feels like a big office. There are five levels of greeting so you can have the option of language, department, personal and more. With auto attendant and automatic call distribution you get efficient use of your personnel and flexibility in utilizing the incoming lines. Your system even automatically switches to a day or night mode. Calls can be picked up from any extension and forwarded to any extension for easy access and convenience. You can even forward the in-coming calls to your cell phone. Using the auxiliary input, you can hook up a message or music, connect a PC to the base console to keep a complete call log, or even download phone books to the system or extension.

**Connectivity**

**Cordless Extensions**

**Desktop Extension (Wireless Desktop Extension)**

- ~ Ergonomic design with comfortable handset
- ~ Speaker phone
- ~ Message waiting lamp
- ~ 3 tilt angle selection and wall mount
- ~ Direct button for PSTN Line selection and voice mail access
- ~ Extra large display

**Handheld Extension (Wireless Handheld Extension)**

- ~ Ergonomic design
- ~ Back lit key
- ~ Large LCD with back lit - 4 rows display with icons
- ~ Speaker phone
- ~ Belt clip and headset jack
- ~ User friendly operation
- ~ Advanced menu with soft key
- ~ Vibration ringer

**Customized & Convenience**

- ~ DIY - You can customize your system according to your needs. Simply configure the system through the telephone's menu setting selection.
- ~ With a headset connected to an extension, it will automatically change over to the privacy headset mode (headset not included).
- ~ The system comes with software so that you can set up a personal computer to operate the phone book uploading, downloading, call logging, or system setting (optional).
- ~ The system allows connection to the doorphone and door opener. You can open the door by speaking through your phone and pressing the selected soft key (optional).
